

Driving Collaborative Innovation for Infrastructure

Established in 2016, the Infrastructure Industry Innovation Partnership (i3P) is a community of client and supply chain organisations that have made a **commitment** to delivering **collaborative innovation** through projects supported by a large **network** of experts and innovators and **world leading** industry **knowledge** that will drive the future **transformation** of the infrastructure and construction industry.

KTN facilitates the secretariat and management of i3P, tapping into its broad network of **diverse industries** and knowledge management. KTN also facilitates the dedicated SME programme that supports our Strategic Priority Themes.

i3P started life as Innovate18 - The Crossrail Innovation Programme which ran between 2012-2017.

Innovate18 started with 12 members of the supply chain. By the end of the programme 18 organisations had joined and **over 450 Innovations** had been shared.

Value of Membership

Scale

Innovation Growth in Infrastructure.

Drives growth and capability to delivery projects with members, ensuring pan-industry adoption of best practice to stimulate change in the industry.

Breadth

Breadth of Ideas & Members.

Broad portfolio of client organisations leading on a variety of key strategic projects plus a broad portfolio of SME's and other industries with which members can collaborate.

Collaboration

From silos to One Team.

Members wear the 'i3P Badge, share experience, solutions and best practice amongst the partnership. Members share on behalf of i3P and represent the i3P brand.
